

# Environmental Policy

Sharjah National Oil Corporation (SNOC), a leading natural gas producer in Northern Emirates, shall proactively **demonstrate our commitment to environmental stewardship, sustainable development, and empowerment.**

We shall preserve, protect, and promote healthier lives in the environment and community where we operate. With our people as our paramount strength, we will conduct our operations with highest **integrity, responsibility and respect** to become an environmental value creator for the Emirate of Sharjah.

## We are committed to:

Comply with applicable legal, regulatory and other international recognized requirements and to **apply international best standard practices** in an absence or inadequacy of a legislation.

Ensure that the **risk and opportunities** are considered as one of the **business primacies in setting of environmental objectives**, pollution prevention initiatives and programs.

Be at par with international and industry EMS thru adaptation **best environmental practices** and **maintenance of ISO 14001.**

Establish accountability and responsibility for **minimizing of environmental impacts and pollution** within organization including its supplier and subcontractors.

Provide training, equipment and other needed resources to **achieve environmental improvement.**

**Monitor and measure established environmental performance indicators** to seek viable ways to minimize the environmental impact of operations, reduce waste, conserve resources and respect biodiversity.

Include **environmental and ethical considerations** in business and investment decisions where appropriate.

Encourage **environment-conscious suppliers** and **subcontractors.**

Set the journey towards sustainability and alignment with **UAE Net-Zero 2050** targets.

**Changes to this policy will be aligned to the outcome of environmental goals progress realization.**
