President Message

It is with great pride that I reflect on SNOC's remarkable transformation from Sharjah's first gas discovery in 1982 to the integrated energy company it is today.

SNOC's story is Sharjah's story – one of vision, perseverance, and strategic foresight. Over four decades, what began as a single exploration well has evolved into a sophisticated energy enterprise managing the full value chain from exploration to delivery, powering our Emirate's industrial growth and supporting the prosperity of our people.

Today, we stand at a pivotal moment. The energy landscape is evolving rapidly, and SNOC is evolving with it. Our Net Zero 2050 commitment is not simply an environmental pledge – it is a strategic imperative that positions Sharjah as a leader in the responsible energy transition. From the commissioning of the Sana Solar Plant to our investments in carbon capture and hydrogen technologies, we are building a diversified energy portfolio for the next generation.

As we expand our presence regionally and pursue new opportunities internationally, SNOC carries forward the legacy of our founding vision: to create lasting value for Sharjah while honoring our responsibility to the environment and future generations. Through innovation, excellence, and unwavering commitment to our community, SNOC will continue to serve as an engine of sustainable growth for our Emirate.

H.H. Sheikh Sultan bin Ahmad Al Qasimi
President

CEO Message

**On behalf of Sharjah National Oil Corporation,
I am pleased to share our story with you.**

For over four decades, the oil and gas concession of Sharjah has served as the trusted energy partner, delivering safe and reliable natural gas to power our Emirate's growth. What began with a single discovery has evolved into SNOC, the Sharjah integrated national oil and gas corporation managing the full energy value chain from exploration and production to processing, storage, and delivery.

Today, we look to the future with purpose. Our Net-Zero ambition reflects our belief that responsible energy development and environmental stewardship must go hand in hand.

Through investments in renewables, carbon storage, and emerging technologies, we are positively contributing to building a sustainable foundation for the next generation. We remain committed to creating lasting value for Sharjah for our people, our community, and our environment.

Our Story

Our Leadership

About SNOC

Sharjah National Oil Corporation is the government-owned oil and gas executive arm of the Emirate of Sharjah, operating under the auspices of the Petroleum Department of Sharjah.

Established in October 2010, SNOC owns and manages all Sharjah oil and gas assets and is the main supplier of natural gas across the Emirate.

With a diversified energy portfolio and over 40 years of operational heritage, SNOC operates as a modern, agile, and sustainability focused national oil and gas company.

As part of its long-term direction, SNOC is advancing its Net-Zero 2050 ambitions and expanding into emerging future energies, supported by a growing pipeline of initiatives in photovoltaic solar, carbon capture & storage, hydrogen, and geothermal research development.

2. What We Do

Operation Overview

Assets & Infrastructure

Operation Overview

SNOC Operations
Include **4 key Areas**:

Upstream

We explore, develop and operate hydrocarbon fields, maximising resource value and ensuring sustainable production while pursuing new opportunities onshore, offshore, in Sharjah and beyond.

Midstream

We process, transport, and store hydrocarbons through our plants, pipelines, and terminals and manage Sharjah's underground gas storage to ensure safe, efficient, and reliable energy delivery.

Trading

We optimize energy flows through strategic commercial operations and partnerships, balancing supply and demand and expanding our presence across UAE and the region.

Energy Transition

We advance renewable and low-carbon initiatives including solar power, hydrogen, geothermal, and CO2 storage that support emissions reduction to drive SNOC's Net-Zero ambition.

Key Assets & Infrastructure

Producing Fields:

- **Sajaa Field:** On production since 1981 (100% SNOC)
- **Kahaif Field:** On production since 1994 (100% SNOC)
- **Mahani Field:** Discovered 2020; first production 2021 "First Discovery in 37 years" (50% SNOC)
- **Hedebah Field:** Discovered 2024; first production 2025 (100% SNOC)

Storage:

- **Moveyeid Underground Gas Storage Field:** Repurposed in 2017 after 3 decades of production

Exploration Blocks:

- **Area A**
- **Area B**
- **Area C**
- **East Coast**
- **West Coast**

Key Assets & Infrastructure

- **Sajaa Gas Plant:** Central processing hub (capacity: 700 MMSCFD) producing fuel gas, condensate, and liquefied products.
- **Full Field Compression Facilities:** Multi-field compression infrastructure units.
- **Pipeline Network:** Over 500 km of pipelines linking fields, plant, terminals and tie-ins to the Dubai & Abu Dhabi gas network systems.
- **Moveyeid Gas Storage Field:** Strategic underground gas storage supporting peak and seasonal demand.
- **Solar Plant:**
60 MW SANA Solar Plant

Key Assets & Infrastructure

- **Condensate Terminal:**
Two 500,000-bbl tanks.
- **Offshore Single Buoy Mooring (SBM):**
Offshore SBM for condensate loading.
- **LPG Blending & Loading Facility (LBL):**
Capacity: 1,000 tons per day
- **LPG Truck Loading Arm:**
Supports bulk LPG loading for domestic and regional distribution.
- **LPG Terminal:**
Two 25,000-ton tanks.
- **LPG jetty for loading/unloading:**
Supports exports, backflow, and import operations.
- **Jet Fuel Import Facility:**
Infrastructure supplying jet fuel to Sharjah International Airport.

4. Investing In Our Future

Sustainability & ESG

Investing In Our Community

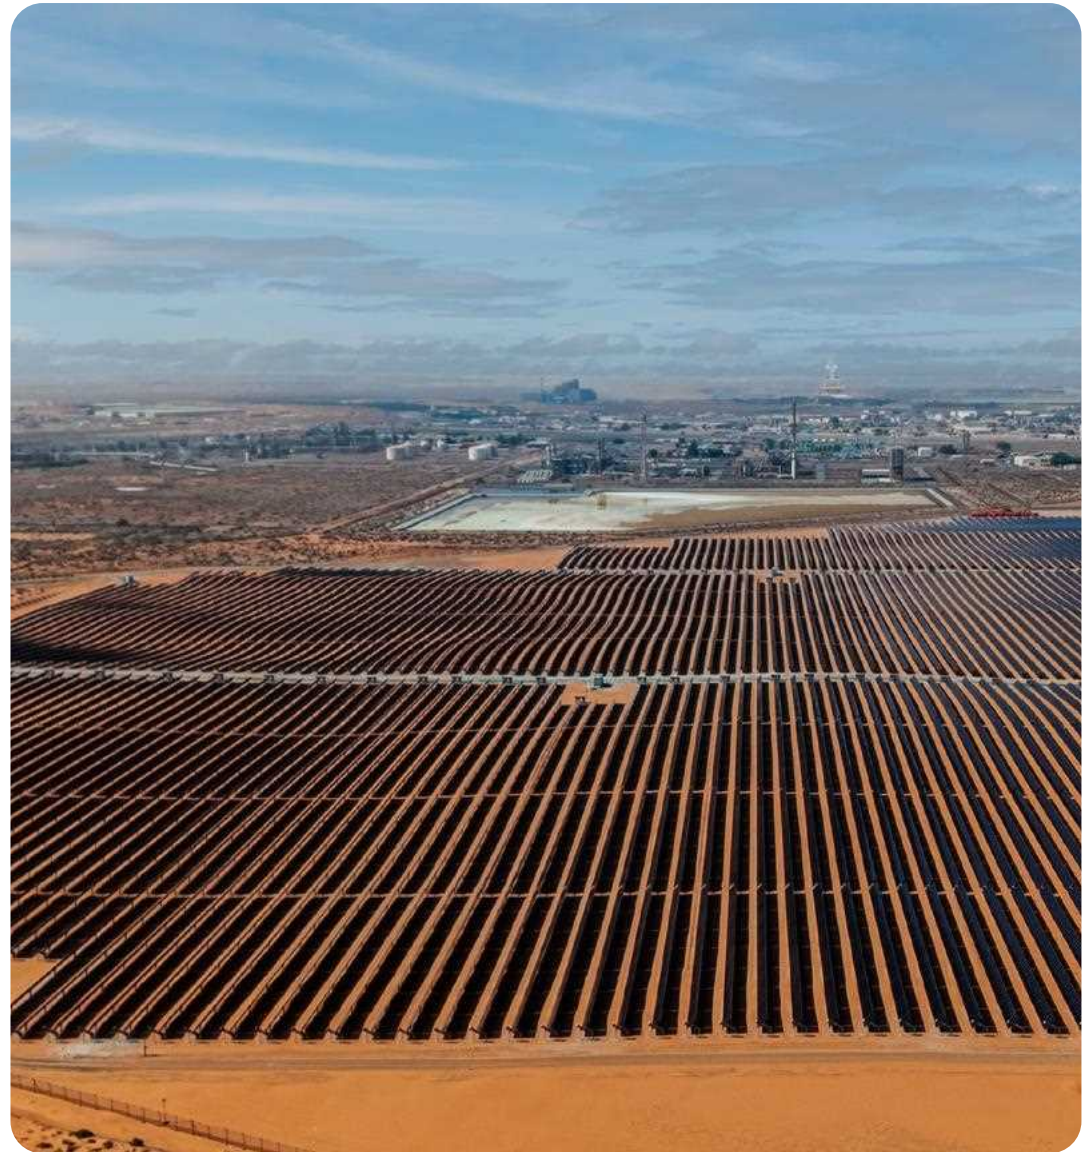

Sustainability & ESG

SNOC is committed to responsible energy development grounded on safety, environmental stewardship, and strong governance.

We continue to improve efficiency, reduce emissions, and uphold the highest standards of integrity and asset performance to protect people and the environment. Our Net-Zero ambition is supported by growing initiatives in renewables, carbon storage, hydrogen, and geothermal energy research development.

Net Zero 2050 objectives:

- Expand solar power and renewable energy projects
- Advance carbon capture and storage (CCS) development
- Electrify operations and reduce reliance on fossil-fuel powered equipment
- Improve energy efficiency and reduce flaring
- Enhance transparency in emissions measurement and GHG and Sustainability reporting

Investing In Our Community

Our CSR strategy is built around three core pillars:

- Empowering Human Talent
- Community Engagement & Social Well-being
- Natural Heritage & Environmental Conservation

These pillars reflect SNOC's mission and align with the UN Sustainable Development Goals and the national priorities of UAE Vision 2031.

Each year, SNOC invests in targeted initiatives across these pillars, partnering with local organizations, universities, charities, and humanitarian programs that contribute to the long-term well-being and development of Sharjah's society.

“ We are part
of the community
we serve.
